

WASTELINE

Fauquier County Environmental Services

August, 2017

Construction Update

Site paving and transfer building construction are scheduled to be completed within two weeks. The siding of the transfer building is currently being put in place, as you can see in the picture below. The transfer building is tentatively scheduled to open in September.

Stay tuned for more updates, but if you have any questions or would like to see the construction plans, please contact the Environmental Services Office at (540) 422-8840.

In This Issue

- Construction Update
- Safety Cone Challenge
- Dates to Remember
- Meet our Staff
- Back to School Recycling

SAFETY CONE CHALLENGE

Environmental Services is always in need of safety cones. They are expensive and some brands ineffective. We know that our employees can do better and we challenged them to create a safety cone that can be used at Corral Farm. Among other guidelines, the employees were required to follow a height requirement, ensure safety colors are present, and create the cone with recycled materials.

Pictured are safety cones submitted by employees.

DATES TO REMEMBER

- 9/2 - Household Hazardous Waste Collection
- 9/4 - Holiday
(All Facilities Closed)
- 9/16 - Household Hazardous Waste Collection

"A society is defined not only by what it creates, but by what it refuses to destroy."

-John Sawhill

MEET OUR STAFF

In early 2015, Ronnie began working for Environmental Services at both the scale house and residential lane located at Corral Farm and has proven to be a great asset to the team!

Ronnie will likely be the employee to greet you when you arrive and he will definitely be the employee wearing shorts while it's snowing.

When not at work, you are likely to find Ronnie spending time with his wife and kids, relaxing on the beach as often as he can, or riding his Harley as he is an avid motorcyclist.

Back to School Recycling

A new school year is upon us! And along with alarms, homework, and pop quizzes, are school supplies and packed lunches. Believe it or not, there is a way to go green as you prepare for the year ahead.

A way in which we can go green is by reducing the amount of waste that is created. In order to reduce, remember to reuse. Many folders and binders available today are durable, and can be used for more than just one school year. This applies to pens and pencils as well. If you find that you do need to make a new purchase, consider purchasing long lasting materials and products that are made from recycled materials. This can include pencils, paper, and backpacks.

Along with reducing and reusing, comes recycling. Make a conscious effort to recycle all paper. Whether it be used notebook paper or school hand-outs, see that they find their home in the recycling bin.

Remember that reusing and recycling can apply to lunch time as well. Packing a lunch in a reusable lunch bag is always a green choice. Also, buying in bulk and packing in reusable containers rather than packing individually wrapped snacks is another way to stay green.
